DETAILED ACTION

Claims 1-19 are present within this instant examination. Claims 8-19 have been cancelled by the applicant and will not be given further consideration within this instant examination.

Priority

Foreign priority for this case is 08/29/2003.

Drawings

The Drawings are accepted at this time since there do not appear to be any issues that would require an objection and/or correction.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowable.

The present invention pertains to memory testing while circuitry is operating based upon information stored within said memory. The claimed invention recites features such as: "a programmable circuit in which information is programmed; an information holding circuit which electronically holds information programmed in the programmable circuit; an internal circuit which operates based on information held in the information holding circuit; a compression circuit which compresses the information held in the information holding circuit; an information output circuit which outputs expected value information; and a detecting circuit which compares the expected value information with compression information of the information compression circuit to

check destruction of information held in the information holding circuit, when the internal circuit operates.”

None of the prior art, either taken by itself or in any combination with any other prior art(s), would have anticipated or made obvious, the following combination of limitations within the above limitations at or before the time the invention within this application was filed: “a programmable circuit in which information is programmed; an information holding circuit which electronically holds information programmed in the programmable circuit; an internal circuit which operates based on information held in the information holding circuit; a compression circuit which compresses the information held in the information holding circuit; an information output circuit which outputs expected value information; and a detecting circuit which compares the expected value information with compression information of the information compression circuit to check destruction of information held in the information holding circuit, when the internal circuit operates.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
